

**INTERIM RULE ENV-A 1100**  
**Prevention, Abatement, and Control of Mobile Source Air Pollution**

Env-A 1100 contains opacity and idling standards for diesel and gasoline-powered motor vehicles, which are intended to reduce emissions of volatile organic compounds (VOCs), oxides of nitrogen (NO<sub>x</sub>), and fine particulate matter (PM<sub>2.5</sub>). The rule expired September 28, 2004, so this interim rule, which took effect November 6, 2004, was adopted while the permanent rule goes through the rulemaking process. The interim rule will expire on May 5, 2005. The interim rule text is the same as the text of the expired rule. Any questions about the interim rule should be addressed to Rebecca Ohler, 271-6749, [rohler@des.state.nh.us](mailto:rohler@des.state.nh.us), and any questions about the rulemaking process for the permanent rule should be addressed to Barbara Hoffman, 271-7874, [bhoffman@des.state.nh.us](mailto:bhoffman@des.state.nh.us).
